

The Engineering Link Project

Are you curious about a possible career in engineering?

TELG has partnered with JCU, the Department of Transport and Main Roads and Engineers Australia to deliver a **hands-on Engineering experience for students in Years 10, 11 and 12.**

Students will participate in engineering projects designed to:

- showcase engineering as it really is – a career full of creativity, problem-solving and teamwork.
- provide students the chance to work with professional engineers, allowing a unique insight into engineering as a career, from people living it.
- give exclusive access to world-class facilities and insights into the under- and post-graduate opportunities at JCU.

“I really enjoyed (the Project) and it has made my mind up that I do in fact want to do engineering”

“I really enjoyed clearly seeing links between what is learnt at school and real-world applications”

Spaces are limited so **register now** to secure your spot

What you need to know
